## Software Design Specification

Class ID	Class Name	Subsystem ID	Description & Responsibility
1	user	2,4,5	Include system's user attributes
1.1	premium user	1	Children class from user but have one addition operation for creating group.
1.2	Page admin	1	Has the same attributes of user in addition of list of pages and extra functions to manage page.
1.3	Group admin		Has the same attributes of user in addition of list of groups and extra functions to manage group.
2	group	1.1 ,5	Contain group's attributes "name 'category 'type premium or normal"
3	post	5	Include operations users can do on posts like share or comment also contain post attributes like type
4	Data Access	1 - 6	Class to save the data of registration name of user and password .
5	Profile	1-7-8-3-2	Class includes operation "icons" user can control his account "search for post ,like or share ,logout....etc
6	Registration	4	Class implemented when user wants to sign up it allow him to register then pass his information into system database to check validation of user's system database to check validation of user's info

### Class - Sequence Usage Table

Class Name	Sequence Diagrams	Overall used methods
Sign up	1-5-6-7	Sign up(),register()
Login	1-5-4-7	Login()-get data()
Create page	1-9	Login()-create page()
Create group	1-2	Login()-create group()
Like or share post	1-3-5	Login()-enter specific page()-like or share post()
Add friend	1-5-8	Login()-search data()-add friend()
Send message	1-5-8	Login()-add friend()-send message()
Enter specific page	1-5	Login()-search for page name ( )enter page()
